Fohat represents Brazilian innovation advantage in the energy sector at 3rd edition of Brazil Showcase

Operating in Australia since 2018, Energy Intelligence Company will be showcasing the country's edge in sustainable solutions alongside top companies Bauducco, Embraer and Latam

Sydney — September 24, 2019 – A select group of Brazilian companies operating in Australia will be displaying their products and services with a focus on sustainability at Brazil Showcase 2019. The energy intelligence company Fohat will be showcasing its sustainable solutions alongside leading Brazilian companies Bauducco, Docol, Embraer, Friboi, Latam, Tramontina, and WEG. The event will be held at the New South Wales Parliament House this Wednesday (25), from 5h30 to 8h30 PM.

Staged every two years since 2015, Brazil Showcase is an opportunity for the country's entrepreneurs, investors and exporters to promote Australia and Brazil as preferential partners in industry and commerce. A wide range of industry sectors will be showcased at the event, such as food and agribusiness, energy and bioenergy, IT, aviation and aerospace, equipment and machinery, as well as consumer goods.

"Both Australia and Brazil are committed to a high value-added, sustainable economy. Brazil has much to show to Australia and the two countries must explore how to combine their strengths in ways that are mutually beneficial", said Sergio Bath, Consul-General of Brazil in Sydney and event organizer.

Appointed by Australia-Brazil Chamber of Commerce (ABCC), Fohat will be represented by Douglas Ferreira, Head of Global Business Development, who is in charge of the company's Australian headquarter, in Melbourne. At the event, he will talk about Fohat's innovative intelligence solutions for the energy sector with a focus on ongoing projects in Australia.

Brazil's Energy Intelligence in Australia

Fohat's flagship project in Australia concerns the implementation of an energy intelligence solution at Queen Victoria Market, in Melbourne, in order to integrate photovoltaic panels and battery storage systems, so that it can achieve its energy self-sufficiency, with the rational

use of energy surplus, that can be used to be traded, optimize its own consumption system or supply it to the market's stores.

In addition, Fohat will soon open a second office in Australia, at Tonsley Innovation District located in the city of Adelaide, whose advanced technology hub is considered a reference in Innovation. The innovation precinct is also home of renowned educational institutes including Flinders University and TAFE SA. The new subsidiary will focus on Research and Development operations in Australia and serve as support for the R&D department in Fohat's Curitiba headquarters, in Brazil.

"We are very excited about the new partnership since it open doors to test our technologies in an environment that breathes innovation. The projects developed through this partnership will be a showcase, attracting the attention of partners and customers to our solutions in a real and dynamic environment", reveals Douglas Ferreira.

Brazil Showcase 2019 is an initiative of the Consulate-General of Brazil in Sydney, with the support of Brazilian Trade and Investment Promotion Agency (Apex-Brazil) and the Brazilian Tourism Board (EMBRATUR), in partnership with the Australia-Brazil Business Council, the Australia-Brazil Chamber of Commerce and the Australia-Latin America Business Council. Approximately 160 people are expected to attend it, from parliament members and consulate staff to entrepreneurs.

About Fohat | Founded in 2017, Fohat is a Brazilian energy intelligence company that offers innovative energy intelligence solutions to enable a free market for clean energy. By efficiently providing cheaper energy, it has the mission of making a positive impact on the planet, people and organizations, with inclusive and sustainable development, responsibly delivering value for the society, the environment and the economy, with social inclusion and wellbeing, which is fully in line with the global 3D energy model (decarbonization, decentralization, and digitalization). FOHAT's solutions cover both edges of the energy sector, from generation to storage (by managing and dispatching Distributed Energy Resources), trade and consumption. It is an industry benchmark for sustainable innovation as the first and only company in Latin America to use blockchain in the energy sector, in addition to being actively involved in the development of the global energy policy framework, with the launch of the Energy Web Chain (EWC) as signatory to the Energy Web Foundation (EWF), in June 2019.
