

Curitiba's energy intelligence company will be at the largest agricultural fair in Latin America

Fohat will present its solutions at AveSui Eurotier South America 2019 Digital Farming Space, reserved for agribusiness startups

CURITIBA - The big names of the Brazilian agricultural industry will be gathered at the largest animal protein fair in Latin America, between Tuesday and Thursday (July 23 and 25), in Medianeira, 58 kilometres from Foz do Iguaçu. At AveSui Eurotier South America 2019, due to the partnership with Gessulli Agribusiness and DLG (Deutsche Landwirtschafts Gesellschaft - German Agricultural Society), there will be a space devoted exclusively to 10 agribusiness startups. Fohat, a Brazilian energy intelligence company with energy matrix innovation solutions, is one of them.

Head of sales and marketing and Fohat co-founder Renan Schepanski, 35, will represent the company at the event. On Tuesday (23), from 1PM, he participates in a lecture within the Digital Farming Space about the biogas and bioenergy scenario in Brazil. It will specifically present energy sector innovations for the poultry, pork, fish and milk industry. They will share with him the chat, Rodrigo Régis de Almeida Galvão, president of CIBIOGÁS, and Yuri Schmitke A. Belchior Tisi, from Girardi & Advogados Associados law firm. They will address respectively the landscape of neogas and bioenergy and the regulatory issues surrounding the area.

Fohat was one of 10 technology companies chosen by NRGHub (a collaborative platform that promotes networking, innovation and sustainability in the renewable energy market) to be at AveSui Eurotier South America 2019 Digital Farming Space. "It's a very important opportunity for us to present the Fohat solutions and differentials for the agribusiness sector, where Brazil is considered the first world because we are prepared to serve it offering potential to increase its competitiveness and efficiency ", says Renan Schepanski.

The executive explains that he will present his innovation solutions that enable energy generation and self-sufficiency, in addition to commercializing more efficiently distributed generation surpluses, which are formatted on different platforms. "Because Fohat strategically operates end-to-end (P2P), its solution portfolio is organized by energy chain sector and market segment, meaning the company has services and products for each link in the chain:
